Mandarin

Projects

Headless CMS Blog, using aws
& vercel to deploy strapi and
website separately

Education

Bachelor Degree, History,
Sichuan University

Profile

When I was a senior CMS manager 6 years ago, I made this career transition to become a software developer. I love getting hands-on with Tech, and I have found that working as a software developer, I get more exposure and hands-on with technology than any other role I have experienced. I don't personally see the previous time as wasted though as it gave me an invaluable insight into CMS industry.

Employment History

Software engineer, Freelance

July 2023 to date

- Building applications in my personal time. Full stack apps using a mix of the following tech: React, NextJS, Typescript, GraphQL, Styled Components & TailwindCSS, Strapi, AWS(EC2, RDS, S3), NodeJS, Git, VS Code
